

CVS Pharmacy

Description of Work:

HCCI has performed work as a Preferred Contractor for over one hundred CVS Pharmacy stores throughout the Southeastern region, including North Carolina, Florida, Mississippi, Louisiana, Tennessee, and Texas. Typical sitework has consisted of approximately a 1.5 to 2 acre site, encompassing earthwork and storm sewer installation, utility installation, asphalt paving, concrete parking lot work and curb work, and landscaping and irrigation work.

The typical exterior of the stores has consisted of a turndown concrete slab with a steel structure, metal studs brick and EIFS exterior Veneer and EPDM roof.

Most prototypical stores have been approximately 13,000 square feet, and work on the inside has included drywall, acoustical ceilings, electrical, mechanical, and plumbing systems, carpet and VCT installation. Additionally, work entails coordination with CVS national account vendors, including fire alarm systems, security systems, CCTV systems, EAS systems and coordination of owner furnished millwork, interior signage, steel cabinets, exterior signage, installation of safes, waste compactors and freezer systems.
